Objective

I'm seeking for 2015 summer internship to enhance my software engineering and team working skills.

Education

Rutgers, The state university of New Jersey

Piscataway, NJ

B.S. Computer Science

2012-2016(Expected)

Current GPA: 3.45

Coursework

Data Structure (112)

Operating System (416)

Computer Architecture (211)

Internet Technology (352)

System Programming (214)

Principles of Programming Languages (314)

Discrete Structure (205 & 206)

Introduction to Python (Coursera)

Skill and Experience

Programming language: Java, C, Python

Web App: HTML, CSS

OS: windows, Linux

Projects

Bit Torrent Client:

- Java based group course project.
- All communication is done via TCP sockets. It also includes a simple GUI that lets user to open the torrent file and shows the current task's time and percentage downloaded.

TinyL Compiler:

- C based course project.
- A simple compiler that only compiles the "TinyL" language. Despite to its low complexity, it leads to great interest for compiler class and building a real-world compiler.
